

PronePillow LOW

Head Support

This product is specifically designed for use by surgeons in theater during spinal operations, ensuring accurate neck and spinal alignment and providing facial and head support for patients in a prone position. For example: rhizotomy.

Product information

- Lightweight, comfortable and easy to handle
- Non-sterile, non-toxic & latex free materials used
- Hypoallergenic, reducing the risk of aggravating common allergies, resistant to mildew and bacteria growth
- Disposable, reducing the risk of cross-contamination and infection
- The Facial Head Support is a polyurethane foam positioner with a T-shape cutout in the middle, designed to support the patient's head and neck during spinal operations in a prone position. The T-shape opening allows for access to the patient's eyes, nose, and mouth, while the foam provides support and alignment for the neck and spine
- Ensure that the mouth, nose and eyes of the patient is aligned with the T-Shape as per picture to not restrict breathing
- It is advised that the medical personnel re-position and examine the patients head position during the procedure to prevent facial injury

Specification

- NAPPI code: 1244406001
- Product catalogue number: 006-PPL
- PronePillow LOW – Head Support
